4TH NORDIC SYMPOSIUM IN MULTIDIMENSIONAL CHROMATOGRAPHY

Key note speakers
Oral presentations
Poster presentation

FIVE SCIENTIFIC THEMES

Peak capacity is not enough: what does multidimensional chromatography need to prove?

Can GC×GC and LC×LC become quantitative routine methods?

AI and multidimensional chromatography: hype, help, or necessity?

Do we need better instruments, better software, or better questions?

What should the next generation of multidimensional chromatographs look like?

AUGUST 24–27, 2027
FAROE ISLANDS

Combine the symposium with our PhD course:
Advanced Analytical Chemistry: Practical Multidimensional Chromatography
